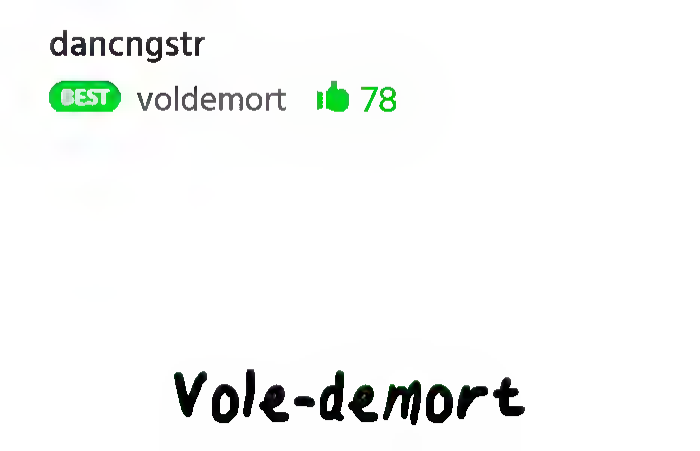
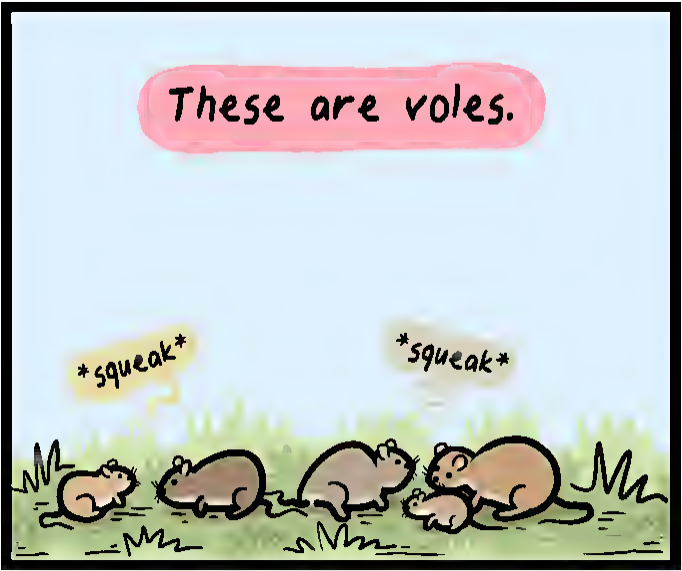
ANIMALS

dancngstr

BEST voldemort 78





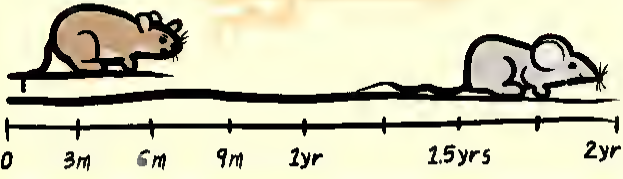
These are voles.
squeak
squeak

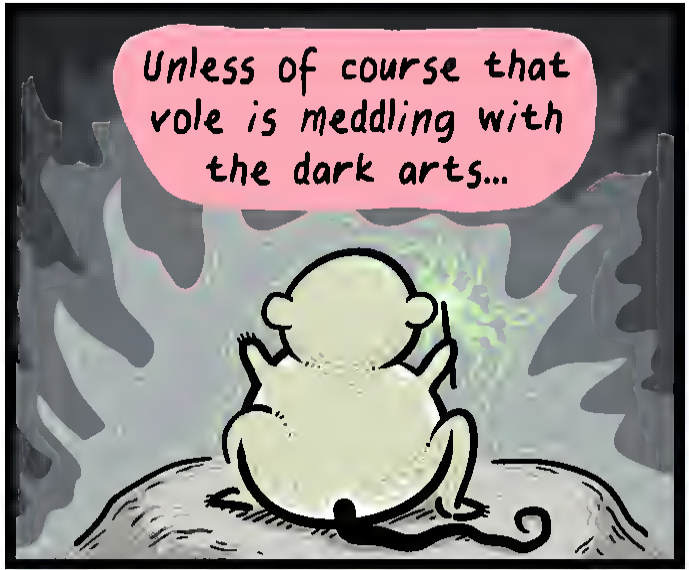
They kind of look like mice.

but we're **not** mice.

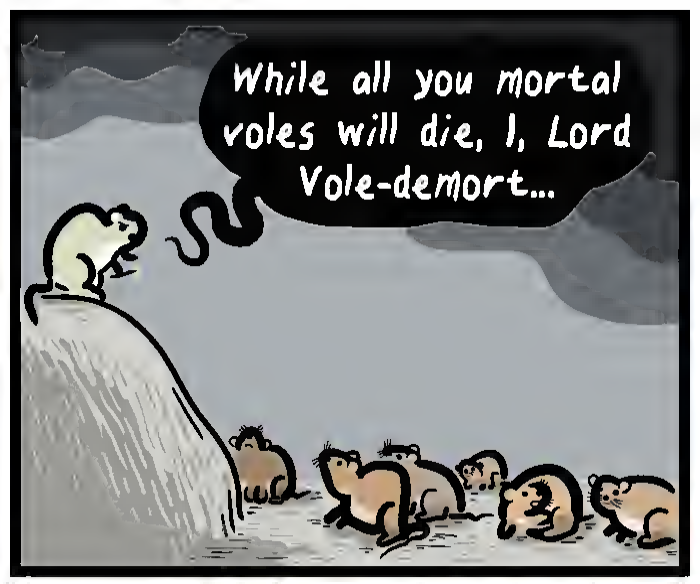
And while mice live for around 1 to 2 years, your average vole only has a lifespan of 3 to 6 months.

how is this fair?





Unless of course that vole is meddling with the dark arts...



While all you mortal voles will die, I, Lord Vole-demort...

I shall live FOREVER!!

dude, what happened to your nose?

SHUT UP OR I'LL EAT YOUR BABIES!!!
